# KHALEELULLAH SHERIFF K

**Frontend Developer | React.js · JavaScript (ES6+) · TypeScript · Component Architecture · REST API Integration**

Chennai, Tamil Nadu, India | +91 8124365714 | kkhaleel.dev@gmail.com | LinkedIn | GitHub | Portfolio

## PROFESSIONAL SUMMARY

Frontend Developer with 3 years of experience designing, developing, testing, and deploying production-grade web applications using React.js, JavaScript (ES6+), TypeScript, and modern component architecture. Independently owns end-to-end frontend development, building reusable components and front-end libraries for enterprise analytics dashboards and AI-powered interfaces, integrated with REST APIs across .NET and Python backend services, live across 24+ client deployments. Strong foundation in object-oriented design, data structures, and algorithm design (B.Sc. Computer Science), with hands-on experience in responsive/cross-browser design, performance optimization, code reviews, Agile collaboration, and debugging production issues alongside product, backend, and engineering leadership.

## TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3

React / Frontend: React.js, Next.js, React Hooks, Functional Components, Context API, Custom Hooks, React Router, Reusable Component Libraries, Micro-Frontend & Composable-UI Patterns, SCSS, Tailwind CSS, Bootstrap

State Management: Redux, Context API, Application State Architecture

API Integration: REST APIs, .NET REST API Integration, Python-Based REST API Integration, Axios, Asynchronous Data Fetching, Error Handling, Postman, Swagger

Data Visualization: Apache ECharts, D3.js, Recharts, Chart.js, Nivo, Apache Superset

Backend & Data: Node.js, Express.js, .NET Backend Integration, Python Backend Integration, MongoDB, SQL

Testing & Tools: Jest, React Testing Library, Git, GitHub, GitHub Actions, CI/CD, VS Code, Docker (Basic), Firebase, Vercel

Practices: Object-Oriented Design, Data Structures & Algorithms, Performance Optimization, Responsive & Cross-Browser Compatibility, Code Reviews, Mentoring, Agile Development, Debugging Production Issues, Direct Stakeholder Collaboration

## WORK EXPERIENCE

**Frontend Developer — Intelizest Solutions, Chennai** Oct 2023 – Present

*Product: Turbozest Business Analytics Platform (AI-powered enterprise analytics platform)*

- Design, develop, test, and deploy production web applications end-to-end using React.js and modern JavaScript/TypeScript, translating business requirements into functional specifications and technical implementation.
- Build reusable React.js components and front-end component libraries, establishing consistent patterns for dashboards, reporting workflows, and configurable/resizable UI modules reused across 24+ live client deployments.
- Participate in application design and architecture discussions, contributing to state management strategy, dynamic chart creation/update logic, and performance optimization of component rendering and re-renders.
- Implement responsive, cross-browser-compatible layouts across desktop and mobile, including fullscreen analytics views, dark mode, and advanced filtering workflows (date, time, shift, plant dimensions).
- Integrate the React.js frontend with REST APIs across .NET and Python backend services; conduct R&D on AI schema modeling and query-generation workflows to build a chatbot UI and SQL-driven data exploration modules.
- Deliver business-critical data visualizations using Apache ECharts, Nivo, D3.js, Recharts, and Chart.js, selecting the right charting approach per reporting requirement.
- Partner directly with product managers, backend engineers, and CEO/leadership in an Agile environment on requirements gathering, code reviews, and client-facing demonstrations — supporting features through to production release and troubleshooting issues in live environments.

## KEY PROJECTS

**Live Vehicle Tracking & Warehouse Product**

- Developed a real-time operational tracking product integrating the React.js frontend with .NET backend REST APIs for live vehicle telemetry — including warehouse layout visualization, animated vehicle movement, dynamic route rendering, and map-style live tracking UI.

**CITACC — Business Leads Connecting Platform (citacc.com)**

- Independently designed, developed, and deployed a production platform serving 1,000+ users — owning the full React.js frontend, authentication workflows, real-time communication, Firebase hosting, and Vercel deployment, using VS Code.

## CORE STRENGTHS

Frontend Architecture • Component-Based Development • Application Design & Requirements Gathering • Micro-Frontend & Composable UI • Code Reviews & Mentoring • Agile Collaboration • REST API Integration • Performance Optimization • Cross-Browser & Responsive Design • Debugging Production Issues • Direct Stakeholder & Executive Collaboration

## CERTIFICATIONS & EDUCATION

- B.Sc. Computer Science — C. Abdul Hakeem College (Autonomous), 2023 | CGPA: 7.78 (Object-Oriented Design, Data Structures, Algorithm Design, Problem Solving & Complexity Analysis)
- Mastering Prompt Engineering – AI Expert (Udemy) • MERN/MEAN 5-in-1 Certification • Build Apps with Claude AI
- Certified Masters in Web Development • Full Stack Web Development – Frontend Modules
